

IN THE CLAIMS:

Amend claims 1-5, 8-12 and 17-20 and cancel claims 13-16 and 21-24 without prejudice or admission, as shown in the following listing of claims which replaces all previous listings and versions of claims.

1. (currently amended) A graphical display adjusting system comprising: means for selecting one graph out of a plurality of graphs which are displayed on a screen by specifying a ~~display area of an axis corresponding to coordinate axis of the selected graph~~ by a pointing device; and means for scrolling the selected graph by another operation of the pointing device.

2. (currently amended) A graphical display adjusting system comprising: means for selecting one graph out of a plurality of graphs which are displayed on a screen by specifying a ~~display area of an axis corresponding to coordinate axis of the selected graph~~ by a pointing device; and means for displaying the selected graph in an enlarged or reduced scale by another operation of the pointing device.

3. (currently amended) A graphical display adjusting system comprising: means for selecting one graph out of a plurality of graphs which are displayed on a screen by specifying a ~~display area of an axis corresponding to coordinate axis of the selected graph~~ by a first operation of a pointing device; means for scrolling the selected graph by a second operation of the pointing device; and means for displaying the selected graph in an enlarged or reduced scale by a third operation of the pointing device.

4. (currently amended) A graphical display adjusting system according to claim 1; wherein the operation of the pointing device for performing scrolling of the selected graph is performed by dragging on the coordinate axis display area on the screen.

5. (currently amended) A graphical display adjusting system according to claim 2; wherein the operation of the pointing device for performing scrolling of the selected graph is performed by dragging on the coordinate axis display area on the screen.

6. (previously presented) A graphical display adjusting system according to claim 1; wherein the operation of the pointing device for performing enlarged display or reduced display of the selected graph is performed by a rotating wheel.

7. (previously presented) A graphical display adjusting system according to claim 2; wherein the operation of the pointing device for performing enlarged display or reduced display of the selected graph is performed by a rotating wheel.

8. (currently amended) A graphical display adjusting system according to claim 1; wherein specification of the ~~display area of the coordinate axis~~ on the screen where the one graph is selected is performed by clicking a mouse.

9. (currently amended) A graphical display adjusting system according to claim 2; wherein specification of the ~~display area of the coordinate axis~~ on the screen where the one graph is selected is performed by clicking a mouse.

10. (currently amended) A graphical display adjusting system according to claim 1; wherein the ~~display area of the coordinate axis~~ on the screen where the one graph is selected is specified by bringing a cursor of the pointing device to the area coordinate axis.

11. (currently amended) A graphical display adjusting system according to claim 2; wherein the ~~display area of the coordinate axis~~ on the screen where the one graph is selected is specified by bringing a cursor of the pointing device to the area coordinate axis.

12. (currently amended) A graphical display adjusting system comprising: means for selecting one graph out of a plurality of graphs which are displayed on a screen by specifying a ~~display area of an axis corresponding to coordinate axis of the selected graph~~ by a pointing device; and means for temporarily eliminating one or more of the non-selected graphs from the screen by issuing a temporary elimination command by the pointing device specifying the axes of the one or more non-selected graphs which are to be temporarily eliminated.

13. - 16. (canceled).

17. (currently amended) A graphical display adjusting system according to claim 12; wherein the ~~display area of an axis corresponding to coordinate axis of the selected graph~~ is not an axis of either a scroll bar or a scaling bar.

18. (currently amended) A graphical display adjusting system according to claim 3; wherein the ~~display area of an axis corresponding to coordinate axis of the selected graph~~ is not a scroll bar or a scaling bar.

19. (currently amended) A graphical display adjusting system according to claim 2; wherein the ~~display area of an axis corresponding to coordinate axis of the~~ selected graph is not a scroll bar or a scaling bar.

20. (currently amended) A graphical display adjusting system according to claim 1; wherein the ~~display area of an axis corresponding to coordinate axis of the~~ selected graph is not a scroll bar or a scaling bar.

21. - 24. (canceled).
